

James A. Russell

ADDRESS: Department of Psychology and Neuroscience
McGuinn Hall
Boston College
Chestnut Hill, MA 02467-3807

Tel 617 552 4546
Fax 617 552 0523
Cell 781 697 1885
e-mail james.russell@bc.edu

BIRTH: March 7, 1947, Santa Monica, California

DEGREES: Ph.D., 1974, University of California, Los Angeles
M.A., 1971, University of California, Los Angeles
A.B., 1970, University of California, Los Angeles

PROFESSIONAL EXPERIENCE:

2010 - -- Affiliated Research Scholar, Queen Mary Centre for the History of
the Emotions, University of London
2010 (Fall) Visiting Professor, Catholic University of Leuven
2003 - 2009 Chair, Department of Psychology, Boston College
2001 - -- Professor of Psychology, Boston College
1995 (June) Visiting Professor, Autonoma University of Madrid
1981 - 1982 Visiting Scholar, IPAR, University of California, Berkeley
1975 - 2001 Assistant Professor to Professor, University of British Columbia
1974 - 1975 Lecturer, University of California, Los Angeles

EDITORIAL RESPONSIBILITIES:

Editor-in-chief, *Emotion Review* (2007 – 2014)
Editor, Special Issue, *Cognition and Emotion*.
Editorial Board: *Emotion* (2010 – 2012), *Philosophical Psychology* (2007 – 2009),
Motivation and Emotion (1990 - 2001), *Cognition and Emotion* (1994 – 2008), *Journal
of Personality and Social Psychology: ASC* (1996 – 2001), *Journal of Personality and
Social Psychology: PPID* (1997 – 2004), *Journal of Nonverbal Behavior* (1996-1999),
Review of Personality and Social Psychology (1991-1992), *Journal of Environmental
Psychology* (1982-1990)

HONORS

Killam Research Prize
Killam Senior Fellowship
UBC Alumni Prize for Research in the Social Sciences
UCLA Chancellor's Fellowship

PROFESSIONAL AFFILIATIONS

Fellow, American Psychological Association
Fellow, Association for Psychological Science
Member, International Society for Research on Emotion
Member, Society for Personality and Social Psychology
Member, Society for Affective Science

OTHER PROFESSIONAL ACTIVITIES:

Invited Keynote Speaker: Affective Computing & Intelligent Interaction (San Antonio, 24-26 Oct 2017); Japanese Psychological Association (Kyoto, Japan, September 9-12, 2014); Western Psychological Association (Vancouver, Canada, May 3-6, 2007); International Society for Research on Emotion (Cuenca, Spain, June 20-24, 2002).
Colloquium Speaker: UC Berkeley; U Penn; New York State Psychiatric Institute; Doshisha U; Columbia; McGill; Autonoma U Madrid; U Mass, Boston; U Mass, Amherst; U Amsterdam; Northeastern; Yale; U Geneva; U Leuven; U Ghent; U Lisbon; U Stockholm; Oxford; U London; Brock U; Emmanuel College; U Glasgow; Loyola U Andalucia.
Executive Committee, ISRE, 2009 –2014
Member, NIH BBBP4 grants review panel, 2002 -03.
Member, NSF Social Psychology grants review panel, 2000-2001.
Coordinator, NATO Advanced Research Workshop, Almagro, Spain, May 1994.
Organizer and Co-chairman, 7th EDRA, Vancouver, B.C., May, 1976.

Statement of Interests

My research interests might seem diverse, ranging from a collaborative study of the role of the amygdala in interpreting facial expressions of emotion to a review of ethnographic and linguistic evidence on cultural variations in people's concepts of emotion to the psychometrics of testing bipolarity in correlational data to the basis of moral judgments. What unifies this diversity is an abiding interest in emotion. My doctoral dissertation examined the idea that behavior within a place is mediated by the emotional quality of that place: how soothing or upsetting, boring or exciting it is. This interest led to more basic questions about the nature of emotion itself.

One continuing line of research concerns something I now call 'core affect.' Core affect is the neurophysiological state consciously accessible as simply feeling good or bad, energized or enervated. A circumplex model of core affect provides a good fit to data on mood, affective reactions to places, and the emotional interpretation of faces; provides a means of integrating various models of mood; and summarizes results obtained with two-year olds and those speaking various languages. One specific focus has been the question of whether feeling good is, as assumed in the circumplex, the bipolar opposite of feeling bad -- or whether these are better thought of as separable or even independent responses.

Another line of research concerns the concepts of 'emotion,' 'fear,' 'anger' and the like. Evidence challenges the classical Aristotelian assumption that these concepts are defined by necessary and sufficient features. Instead, to have the concept of, say, anger is to know a prototype or script for anger. To categorize an event (perceiving oneself or another) as anger is to perceive a resemblance between the event and the script. Resemblance can occur in varying ways and to varying degrees, with no feature of the script necessary or sufficient. Emotion concepts in English resemble but are not identical with emotion concepts in other languages.

A third line of research concerns the claim that basic emotions produce facial signals that are easily and universally recognized. There are a variety of ways to account for existing data without making this assumption. A similar conclusion stems from studies of how children come to understand facial expressions.

Recently, I turned to the integration of these various strands into a broad framework, called the psychological construction of emotion, which tries to provide a fresh perspective on continuing conceptual debates about the nature of emotion, ranging from the idea that emotions are universal aspects of human nature to the idea that they are artifacts of human culture. The next step is integrating psychological construction with other perspectives on emotion.
